2017 NORTHEAST TRANSPORTATION SAFETY CONFERENCE
October 24 - 25, 2017
Cromwell, Connecticut

Road Safety Matters - Tech, Trends & Tomorrow

This is an opportunity to discuss current trends and the future of all aspects of traffic safety.

This innovative conference will bring together engineering, education and highway safety specialists from all over the Northeast to focus on our common goal: the reduction of fatalities and injuries on our roadways.

School Bus Safety

The school bus is the safest vehicle on the road and, according to National Highway Safety Administration (NHTSA), a child is much safer taking a bus to and from school than traveling by car. Although four to six school-age children die each year on school transportation vehicles, that's less than one percent of all traffic fatalities nationwide. NHTSA
believes school buses should be as safe as possible. That's why their safety standards for school buses are above and beyond those for regular buses.

Further information on school bus safety can be obtained at: www.nhtsa.gov/road-safety/school-buses

**Pedestrian Involved Collision Study**

The Connecticut Department of Transportation (CTDOT), in conjunction with the University of Connecticut, is conducting a pedestrian involved collision study. Any Law Enforcement agency concerned with a pedestrian collision issue and willing to participate in this study is asked to contact **Dr. Smruti Vartak** at UConn for details.
